SOCIAL SCIENCE

Learning is not attained by chance; it must be sought for with ardor and diligence.”

We at Delhi Public School Vapi, believe that every child has immense potential with inherent talent. Thus, to encourage and motivate the students, learning-based specific subject-related to instill a sense of team spirit, and perfectionism in them activities were conducted in the month of October and November respectively.

The students of grades III to VII were deeply engrossed in subject-related activities like designing a book cover and expressing the summary of the book read by the students in detail. The children showcased their acquaintance and consciousness of the language in Hindi, Gujarati, and English, by debating, discussing verbs etc. The students showcased their skills by performing role play of various characters by creating their characters, highlighting their collaboration and coordination with their classmates. Numerous LSRW activities were designed to enhance their linguistic skills which explicitly will help our students in improving and learning the language within their subject area.

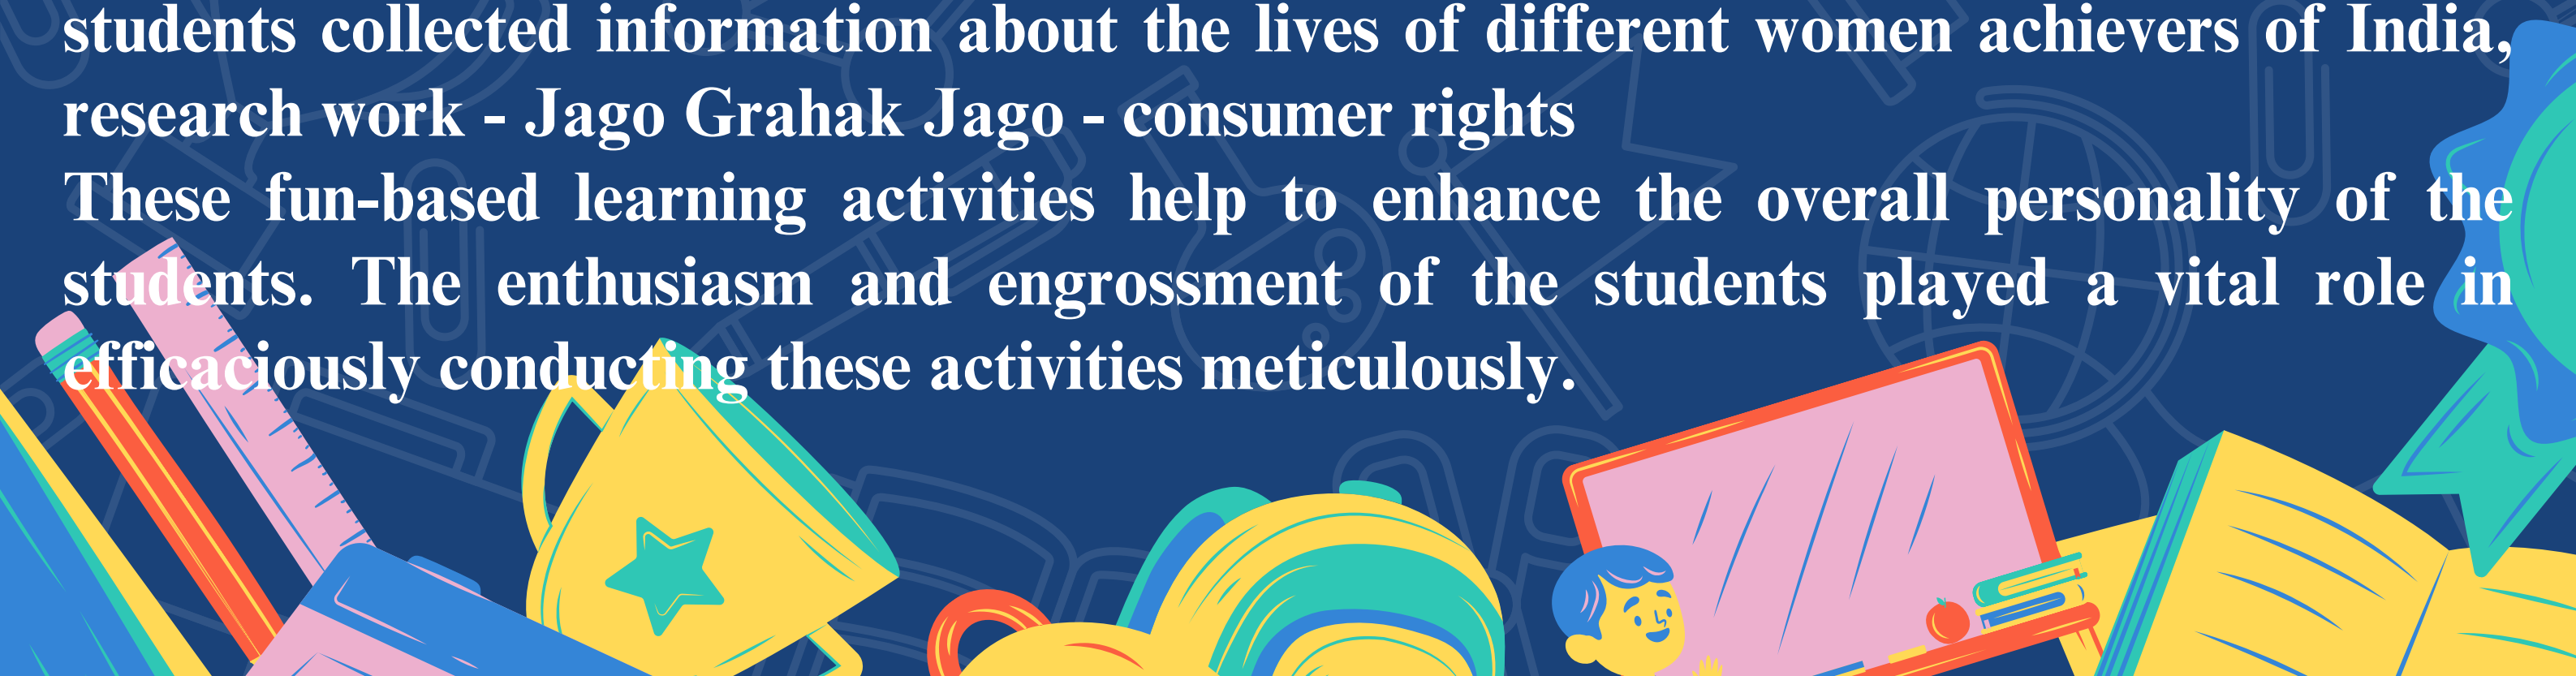

Students performed in an extemporaneous manner presenting their excellent speaking skills. Asking and framing questions were made easy by mixing a hue of excitement in them.

Mathematics was interestingly taught through multiple lab activities coupled with many activities which were also performed using the fraction kit. It gave them a chance to explore their new abilities and learn new things.

The ideal way to study Science is by experimenting and practicing it. Our students acquired more knowledge of their authentic environment by getting involved in varied hands-on activities. Practical knowledge was imparted through self-created models in the classrooms.

In Social Science Jewelry making students crafted elegant jewelry items with the help of beads and strings, clay etc. Making a plan layout - students prepared a layout (plan) showcasing the placement/location of their classroom. Silk route - students did research work on the silk route and read different texts available related to the topic. They creatively plotted the silk route on a world map. Wall hangings - students prepared unique wall hangings, to understand how these were used during the ancient times to decorate the doors of the house. People made a door hanging using a swastika symbol, which is one of the symbols of Jainism. Women change the world - students collected information about the lives of different women achievers of India, research work - Jago Grahak Jago - consumer rights

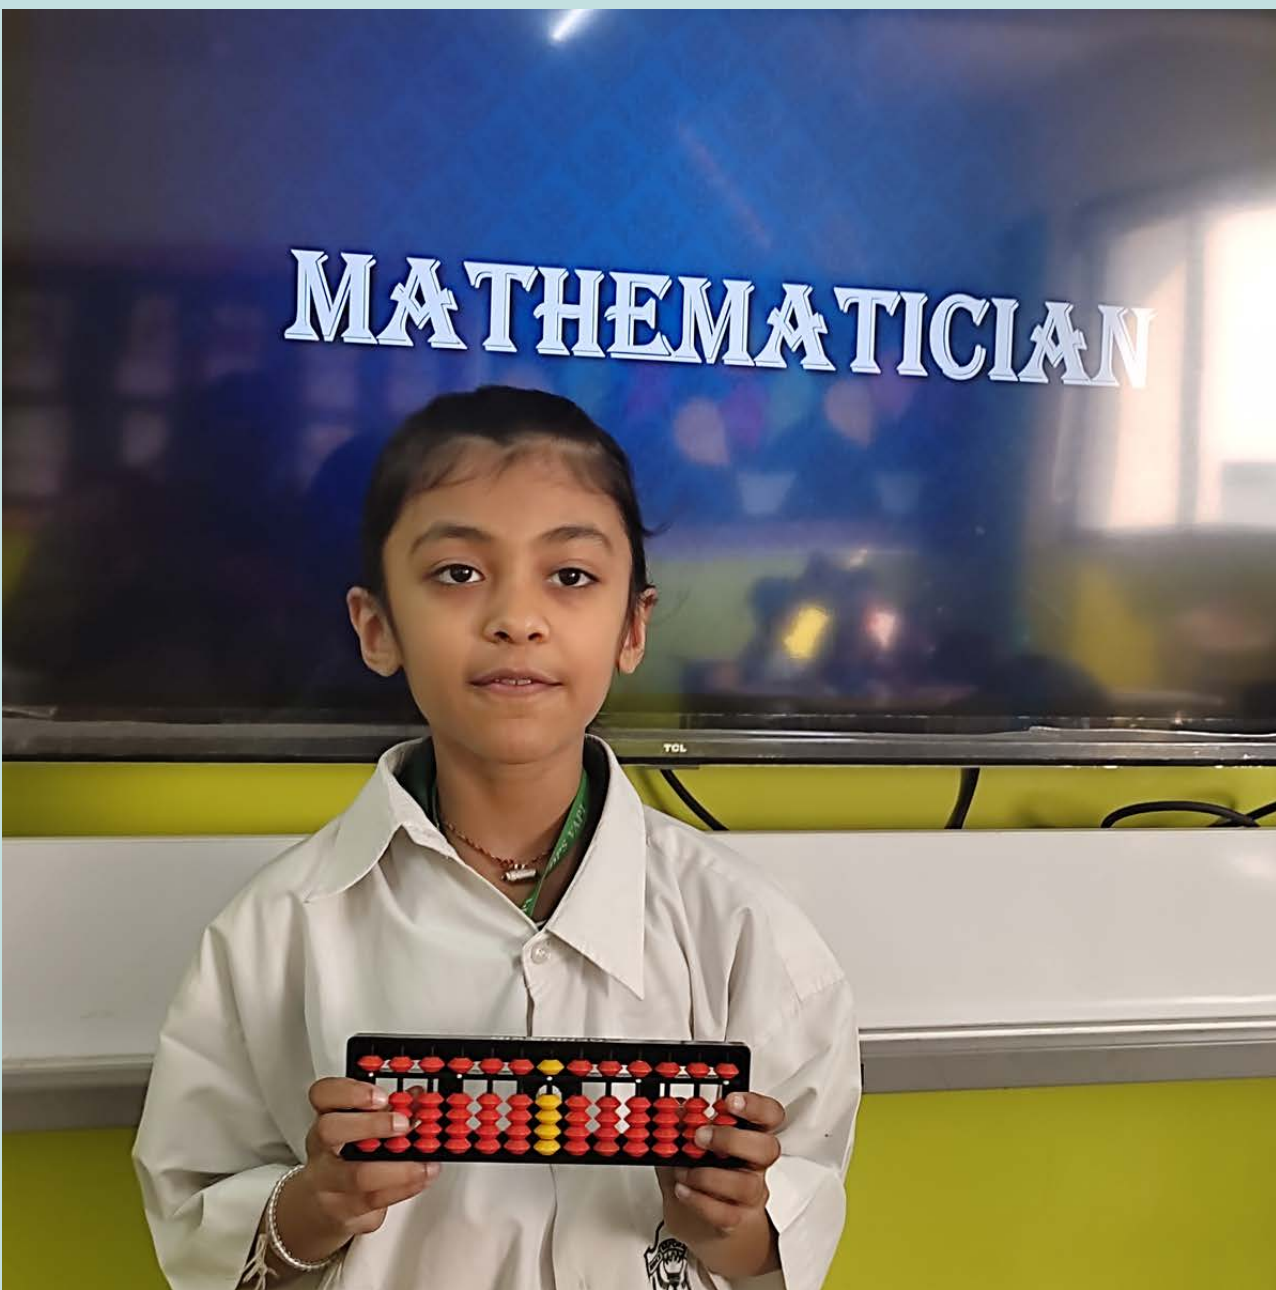

These fun-based learning activities help to enhance the overall personality of the students. The enthusiasm and engrossment of the students played a vital role in efficaciously conducting these activities meticulously.
